Evacuate immediately if told to do so, as delaying could risk your life.

An emergency or disaster may occur when family members are together or separated while at work or school. Having a family emergency plan will give you the reassurance that family members know what to do and will be able to take care of themselves.

**Prepare for an Evacuation**

Here are a few steps to prepare in case you have to leave your home after a disaster:

- Register your cell phone numbers with Alert Marin to receive emergency notifications.
- Register for Nixle alerts by texting your zip code to 888777.
- Create an Emergency Contact card for each member of the family.
- Talk with your family about what you would do during, and immediately after, a disaster, regardless of where you may be.
- Practice Drop, Cover and Hold On as you would during an earthquake, so everyone knows what to do.
- Make sure everyone knows how to text, as voice messages or calls may not be operational after a large-scale disaster.
- Designate a meeting place where you will all reunite if you’re not together during the disaster. Perhaps a nearby church, school, or community center.
- Identify an out-of-area phone contact since you may have a better chance of getting a phone connection to a number 200 miles away, than a local number. This contact person can pass information on to the rest of your family that you’re okay. Make sure your child has this number in their school backpack.
- Know how to turn off your gas and water. Keep a wrench by the gas meter. Only turn off the gas if you smell “rotten eggs” or hear a whooshing sound inside or in the yard. Call 911. Show your children where the gas meter is located and if they are alone and smell gas, have them go to an adult neighbor for help to turn it off.
- Know your children’s school plan and what you need to do to check them out if students are to be dismissed.
- Make copies of important documents and photos. They can be scanned and stored on a portable hard drive or online storage service. This might include passports, birth certificates, marriage licenses, insurance, and mortgage papers.
- Consider getting earthquake insurance and look into renter’s insurance.
- Take photos or home movies of your home and possessions and store in a place other than your home.
If You Are Told to PREPARE to Evacuate

- **Listen** to your local radio (740 AM, 810 AM, 88.5 FM) and follow directions of local emergency officials.
- **Alert your neighbors** to the danger, especially if they are seniors, disabled, or children who may be home alone.
- **Move your car** off of the street so that you do not block emergency vehicles.
- **Park your car** in your driveway with the front facing the street. Roll up your windows and keep the keys on your person.
- **Get dressed** in cotton or wool long pants, long sleeved shirt, and sturdy shoes. Carry gloves, N95 mask, goggles, and flashlight.
- **Assemble** your irreplaceable possessions (photo albums, original art, computer records, insurance records, etc.). Use your **Grab and Go Checklist (Top 10 in 10)**.
- **Prepare** to evacuate on foot if needed. Use your green or blue garbage cans to cart items if necessary. Take your **Grab and Go Bag** with you.
- **Secure your pets** and have leashes and carriers ready to go.
- **Post a note** telling others when you left and where you are going.

When You Evacuate

- **Take only one car** per household, as this will decrease the number of cars on the road and hasten your evacuation. Keep your windows closed and the fan on recirculate.
- **Know two ways out of your neighborhood** in case one way is blocked.
- **Have a destination in mind** when you evacuate.
- **If driving**, move out of the way when confronted by approaching fire trucks.
- **Know your local Community Refuge Areas (CRAs)**. These are open, often paved areas, such as parking lots or community centers, where you can park, stay in your car and you will be safe. This will be important if the fire is too close or the traffic is too heavy to evacuate. Once the threat is less eminent or traffic has lightened, you can move on.
- **Do not leave your car** where it will block the road or hinder firefighters.

If a Fire Breaks Out in Your Home

- **Call 911**. Call out or account for all family members and pets.
- **Test doors** for heat using the back of your hand. If you feel any heat, don’t open the door, and use an alternate exit.
- **If door is cool**, open carefully, checking for smoke or flames.
- **Crawl with your head** 12-24 inches above the ground to stay under the smoke.
- **Once you are out of a burning building**, do not go back inside for any reason.
- **Meet your family in a designated meeting place**.
